

WATER CARE[®] 
Making water good for life.[®]

CareSoft Series[®] Softeners

Everyday essentials **begin with great water.**

Water. It touches our lives in so many ways. Your family depends on clear, clean, quality water every day for laundry, dishes, bathing, cleaning, cooking and yes, even drinking. That's why WaterCare® is dedicated to making water good for life.

There's a lot of technology and know-how needed to provide your household with the quality water you deserve. Our CareSoft Series® Softeners are proudly made in the USA, and are designed to provide the best water possible.

Better treatment. Better water. **Best solution.**

Just like every family is different, every household has unique water. Which also means every household has specific water treatment needs. Whether you're a city water customer or a well owner, your water problems could include:

- Rust colored stains
- Blue and green stains
- Foul odor and taste
- Build-up and scale
- Corrosion damage

When your water performs better, your appliances and fixtures perform with higher efficiency. Quality water requires less detergent, shampoo and cleaners. With a CareSoft Softener, your skin will feel smoother, laundry will come out brighter and your household appliances and plumbing fixtures will last longer. And that adds up to money-savings for you and your family.

Available on select models, Water Efficient Technology is our latest eco-friendly breakthrough. W.E.T. is a series of patented features to reduce the amount of water used in conditioners, softeners, and filters. W.E.T. also reduces the amount of salt that softeners and conditioners use and will keep track of how much your household has saved!

As your professional WaterCare dealer, we can help pinpoint your specific water problems and tailor the CareSoft Series system that's perfect for your individual household needs.

A photograph of an elderly woman with grey hair and a young girl with blonde hair, both smiling and washing their hands at a kitchen sink. The woman is on the left, leaning over the girl on the right. They are both wearing white shirts. The background is a bright window with a view of greenery. A green semi-transparent banner is overlaid on the middle of the image, containing text.

Quality for your household. Convenience for your lifestyle.

CareSoft Series® Softeners are designed to be flexible, and include a highly advanced control system and eco-friendly features with amazing operating efficiencies. You can rest assured that there is a CareSoft Series Softener with the solution for your hard water problems.

CareSoft Elite®

Advanced efficiency for your home.

Softening water is just the beginning for the Elite. It's also a deep cleaning unit that delivers and maintains a higher quality of water.

Its high-performance resin media and patented chlorine generator* cleans the system with each regeneration and helps to reduce unwanted tastes and odors.

The Elite also features CareSoft's most advanced and efficient electronic control system. This innovative controller allows your Elite system to be fine-tuned specifically to your water treatment needs. Saving you water, and ultimately money.

- Watch your home's water usage, receive salt reminders, and system notifications right to your mobile phone with our advanced WiFi technology.

Only available on CareSoft Elite Series Models.

CareSoft Elite RC®

The power of two systems in one unit.

The Elite RC knocks out two bothersome water problems in one unit. Ideal for reducing both hardness and chlorine from your city water, it delivers the clear, soft, odor-free water you want and need.

Utilizing split tank technology, the Elite RC combines the power of high-performance media with activated carbon in one tank. So there's no need for two systems. This environmentally-friendly design protects your household plumbing, improves taste and eliminates odors while saving you time and money.

The result is the quality water you need for everyday life.

Activated Carbon

High-Performance Media

*Our chlorine generator is not intended for treating non-potable water.

When it comes to the Elite, efficiency is in the details.

Every component, every feature, every innovation that goes into the CareSoft Elite has been designed to bring the highest quality, most efficient water to you and your family.

Patented chlorine generator.

- Self-cleaning system
- Monitors every regeneration
- Low salt alarm capabilities
- Only available on Elite and Elite RC

Patented IQ² technology for better water.

- Cleans itself only when necessary
- Exclusive features save salt and water
- Vacation Mode - convenient, money-saving
- System notifications
- Only one internal moving part for easy maintenance
- Battery back-up
- Water use is monitored and recorded

Resin media that performs.

- Powerful and durable resin media
- Eliminates hardness from municipal or well water
- Rigorous quality control process for testing resin media

Low-maintenance brine tank.

- Built-in safety float
- Heavyweight, corrosion-free material
- Dry salt storage
- Less cleaning
- Soft water refill feature keeps system cleaner and reduces susceptibility for service

Quartz underbedding.

- Provides accurate and efficient cleaning process
- Delivers high and consistent flow patterns

CareSoft Pro®

Pure simplicity.

Featuring patented IQ² technology,* CareSoft Pro is the smartest generation of adjustable water softeners. It is specially designed for your lifestyle using less water and less salt, but performing with maximum efficiency automatically.

Unwanted minerals and hardness are a thing of the past when your WaterCare® dealer tailors your CareSoft Pro system to effectively meet your household's specific needs for clean, soft water.

Also available as CareSoft Pro RC Softener System.

**Excluding the chlorine generator and its features. Optional salt monitor available.*

CareSoft®

Smooth softening.

CareSoft brings your household water to a new level of quality. Developed with similar innovations as our more advanced models,* CareSoft is designed for no-fuss, maximum efficiency. It is a good, cost-effective option that's simple to operate delivering the quality water you and your family are looking for.

**Excluding the chlorine generator and its features. Optional salt monitor available.*

The CareSoft Elite, CareSoft Pro, and CareSoft models are also available in a cabinet design.

CareSoft® Twin Softener Systems

Higher capacity meets higher efficiency.

Some households are a little bigger and some daily schedules are non-stop. These lifestyles require more water and more capacity. That means high-quality water must be available when you want it and need it – 24 hours a day, 7 days a week.

Twin systems take high capacity water treatment to the next level. These units utilize patented IQ² technology, which ensures the system sustains an efficient supply of cleaner water and utilizes its full capacity.

CareSoft Twin Softener Systems are available in the following units:

- CareSoft Elite®
- CareSoft Elite RC®
- CareSoft Pro®
- CareSoft Pro RC®

Water treatment innovations inspired by your lifestyle.

CareSoft Series® Softeners are part of the WaterCare® water treatment product line, and are built in the USA. WaterCare has been dedicated to making water good for life and developing industry-leading innovations for over 60 years.

As a WaterCare dealer, we are part of a select group of certified dealers who exclusively sell and service WaterCare systems. With WaterCare, you can be assured of the cleanest water for your family, along with the highest level of customer service.

We have proven water treatment industry expertise and received extensive product and service training specific to WaterCare's water treatment systems. Above all, because of the flexibility of the WaterCare systems, we can tailor your water system to best satisfy your family's needs. That's how we make water good for life.
